

# 3CX Phone System for Windows

## Break free – with a software based IP PBX for Windows

Break free from conventional, proprietary, phone systems and move to an open standard IP PBX that provides superior features, is more flexible and costs much less. Evolve your communications by allowing employees to hot desk anywhere in the office, and enable tele-working by allowing employees to answer their extension from anywhere. Globalize your business by re-directing local customer service numbers via the Internet to your phone system at negligible cost.

*How it works: 3cx Phone System runs on a Windows machine and connects any SIP soft or hardware phone as extensions. External lines are connected using VOIP Gateways (keep your PSTN lines) or using a VOIP provider.*

## 10 reasons to switch to a SIP based IP PBX:

- Eliminate phone wiring
- Much easier to install & configure than a proprietary phone system
- Easier to manage because of web/GUI based configuration interface
- Significant cost savings using VOIP providers
- Eliminate vendor lock in
- Easily Scalable to unlimited lines and extensions because of software architecture
- Better customer service & productivity
- Twice the phone system features for half the price
- Allow hot desking & roaming
- Better phone usability: SIP phones are easier to use

### An open, vendor independent system that can grow and change with you

3CX Phone System for Windows is an IP PBX that completely replaces your proprietary PBX, supports standard SIP soft/hard phones from any vendor, VOIP service providers and traditional PSTN phone lines. Add extensions by simply adding SIP phones to your network or add line capacity via a VOIP provider or VOIP Gateway. Pick and choose SIP telephony equipment and save on consultants' fees because of 3CX's easy to use web-based administration.

Overcome the limitations of outmoded hardware-based PBX systems, reduce costs significantly and add advanced communications features that will make your company more efficient and competitive.

## 3CX Phone System for Windows Features

### Call Assistant makes call management a breeze

3CX Phone System includes a compact Windows application which allows users to manage their calls and extension with a few mouse clicks. Calls can be placed and received from their normal phone, however with a few mouse clicks calls can be transferred to another extension, to voice mail or put on hold. 3CX Call Assistant displays a complete call history, including missed and placed calls, and allows you to easily place a call without having to dial the number again.

### Presence information

3CX Call Assistant also allows users to quickly set their call status: Available, in a meeting, on a call and so on. Employees can quickly view the status of each user and avoid unnecessary transfers to other employees who cannot take the call in the first place.

### Extensive, enterprise level, feature set

Now you can meet the most difficult of communication challenges with enterprise level features - and at a purchase cost dramatically lower than a traditional PBX:

- Reduce long distance and inter office call costs using the Internet
- Web-based configuration - Easy phone system management!
- Unified messaging - allow users to receive voice mail via e-mail
- Auto attendant (e.g. 1 for sales, 2 for support etc.)
- Support for standard SIP phones, eliminating expensive proprietary system phones
- Allows for Call Queuing (Enterprise edition)
- Connect to Enterprise CRM & ERP applications (Enterprise edition)

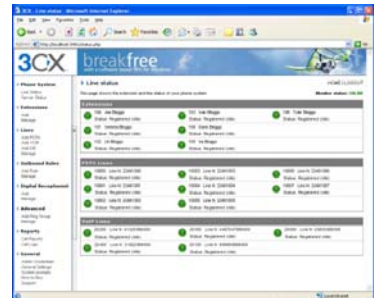

### Available in 4 versions: Free edition, Small Business, Pro and Enterprise

3CX Phone System is available in 4 editions to match your company size and needs. The Free edition, which is fully featured, allows up to 8 external lines and includes a scaled down version of the Call Assistant. The Small Business version includes the full featured call assistant, supports up to 16 external lines and up to 25 extensions and the ability to purchase support. The Pro version adds support for up to 32 external lines and unlimited extensions, whereas the Enterprise edition adds Exchange 2007 UM integration, call queuing and branch office support. A detailed featured comparison chart can be found on <http://www.3cx.com/phone-system/enterprise-features.html>

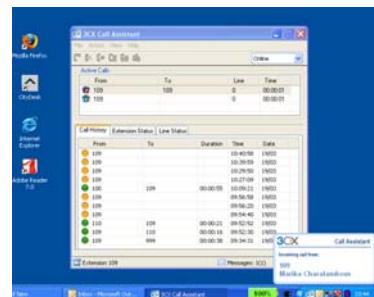

### System Requirements

- Windows 2000, XP, 2003 Server or Vista
- Minimum 1 GHZ and 256 megabyte of ram
- SIP based software or hardware phones
- To connect PSTN lines, a SIP based VOIP Gateway or a SIP based VOIP provider is required.
