

# Comparison

## Why Choose Kerio Connect Over Microsoft Exchange?

### Easier to administer

- Requires less IT resources.
- Installs in minutes with one installer.
- Secure administration from any browser via the full featured Web Administration.
- Self-contained services - no dependencies.

### More flexible deployment

- Deploy on Windows, Mac or Linux.
- Versatile user authentication – integrates with AD, OD, or the built-in Kerio directory.
- Virtual appliance options for hypervisor or Cloud-based deployment.

- Manage a single email domain across multiple Kerio Connect servers via distributed domain.

### More cost-effective

- Five solutions in one: collaboration server, mobile email, email security, email archiving, and server backup.
- Install Kerio Connect on a workstation and save on the operating system cost.
- Lower total cost of ownership.
- Scale as storage and user count grows.

### More than just a mail server

#### Five Solutions in One

-  Cross-platform collaboration
-  Wireless mobile synchronization
-  Robust email security
-  Email archiving
-  Automated backup

### Testimonials

"The nice thing about Kerio Connect is that with all the protocols it can speak, it can handle email, calendaring, and resource scheduling for your whole company, no matter what platform or device an employee needs or wants to use. And, it does so without the headache, nonsensical limitations, and high-maintenance needs of Exchange."

— Kevin Anderson  
President and CEO,  
Computer Stores Northwest Inc.

### Reviews

"Excellent. Kerio Connect is the only vendor to offer a complete cross-platform solution, supporting multiple protocols, working with CalDAV and iPhone."

Norbert Graf  
Linux Magazine

"Kerio Connect offers advanced anti-spam and anti-virus features, comprehensive connectivity, and strong mobile email support."

Jürgen Heyer  
Internet Magazine
